

# AIRPLANE TICKET

Creating a travel plan to visit Australia

## GRADE 7

### MATERIALS

- picture of student
- scissors
- a stamp
- glue

### STANDARD

- SS.7.3.12

### OBJECTIVES

- Students will calculate the distance between cities and the cost it takes to travel.
- Students will fill out traveling documentation.

### PROCEDURE

- Have students choose an Australian city on a map and measure the distance between the city in which you are in and the Australian city of their choice. Calculate the distance in both miles and inches.
- Next, have students determine the price of their trip.
- Have students fill out the passenger information form, passport application form, and the passport.
- Finally, have students label the continents and oceans on the map provided, put a star on the Australian city they chose, put an x on their hometown, add directions to the compass rose, and label the equator.

### RECOMMENDED ASSESSMENT

- Ensure that students completed the forms and performed the correct calculations in the distance and cost sections.

### EXTENSIONS

- Use a Venn diagram to compare and contrast the United States and Australia.

# AIRPLANE TICKET

Name \_\_\_\_\_

Choose a city in Australia that you wish to visit. Measure the distance from your home to that Australian city. Use a map of the world. Don't forget to use the scale of miles on the map.

Name of the Australian city you will visit: \_\_\_\_\_

How far is it from your home to that city in miles? \_\_\_\_\_

How far is it from your home to that city in inches? \_\_\_\_\_

Determine the cost of your airplane ticket, based on the information above. Pretend it costs 50 cents to travel one mile.

How much does a one-way ticket cost?

\_\_\_\_\_

How much will a round-trip ticket cost?

\_\_\_\_\_

## AUSTRALIAN ADVENTURE AIRLINES PASSENGER TICKET
